### OFFICE USE ONLY

**You must file this form within 120 days after putting water to use in order to receive your water right.**

**Maximum Appropriation:** 350 gallons per minute – non-consumptive use

**Source:** Groundwater, meaning any water located beneath the surface of the earth.

All water extracted must be injected into the same source aquifer, and at similar depth intervals to the extraction well, without delay, such that, water withdraw and discharge are equivalent after coming into balance.

The nearest existing well and any hydraulically connected surface waters must be more than twice the distance away from the extraction well as the distance between the extraction and injection wells.

## INSTRUCTIONS FOR GEOTHERMAL HEATING/COOLING NOTICE OF COMPLETION

*There are special federal requirements regarding injection wells and water quality. Filing requirements may apply to your development. Please visit <http://water.epa.gov/type/groundwater/uic/class5/> for more information regarding the Class V well inventory process.*

### 1. Water Right Owner Information

Enter the complete name of the person(s) to be listed as the water right owner(s), their mailing address, and a phone and email address. Applicants should match the title on the property.

### 2. Project Construction

Attach the well log to your application and Provide the construction date and completion date.

Well logs can be found at <https://mbmgqwic.mtech.edu/>

### 3. Period of Use

Enter the period of use.

### 4. Extraction Well Location

Latitude and Longitude must be entered. Enter the land description for the location of extraction.

Describe

the location to the nearest 2.5 acres if possible.

Legal land descriptions, subdivisions, geocodes, and certificate of survey information may be obtained from

the county records, tax statements, or from the Montana Cadastral system at:

<http://svc.mt.gov/msl/mtcadastral/>

Certificate of Survey - In addition to the land description, enter the certificate of survey number.

Subdivisions – In addition to the above description, if applicable, enter the lot and block or tract number, subdivision name.

Government Lots – In addition to the land description, if applicable, enter the government lot number.

Street or Road Address – Enter the physical address of the development including city, state, and zip code.

### 5. Injection Well Location

Follow the same instructions above (Extraction Well Location) for the location of the Injection well.

### 6. Flow Rate and Pump Information

Enter the flow rate used, the depth of the pump intake, and the make/model of the pump used for your geothermal heating/cooling well.

### 7. Distance from extraction well head to Injection well head

Enter distance (in feet) between point of extraction and point of injection. Enter the depth of both the extraction well head and the injection well head in feet.

### 8. Distance from Extraction well head to both Nearest Existing Well and Hydraulically Connected Surface Water

Enter distance (in feet) from the extraction well to both the nearest existing well and nearest hydraulically connected surface water source.

### 9. Place of Use

The geocode of the place of use must be provided.

If the point of diversion (extraction well location) differs from the place of use, check the 'No' box and

fill out the land description for the place of use following the instructions listed above in #4 (extraction

well location).

**10. Map**

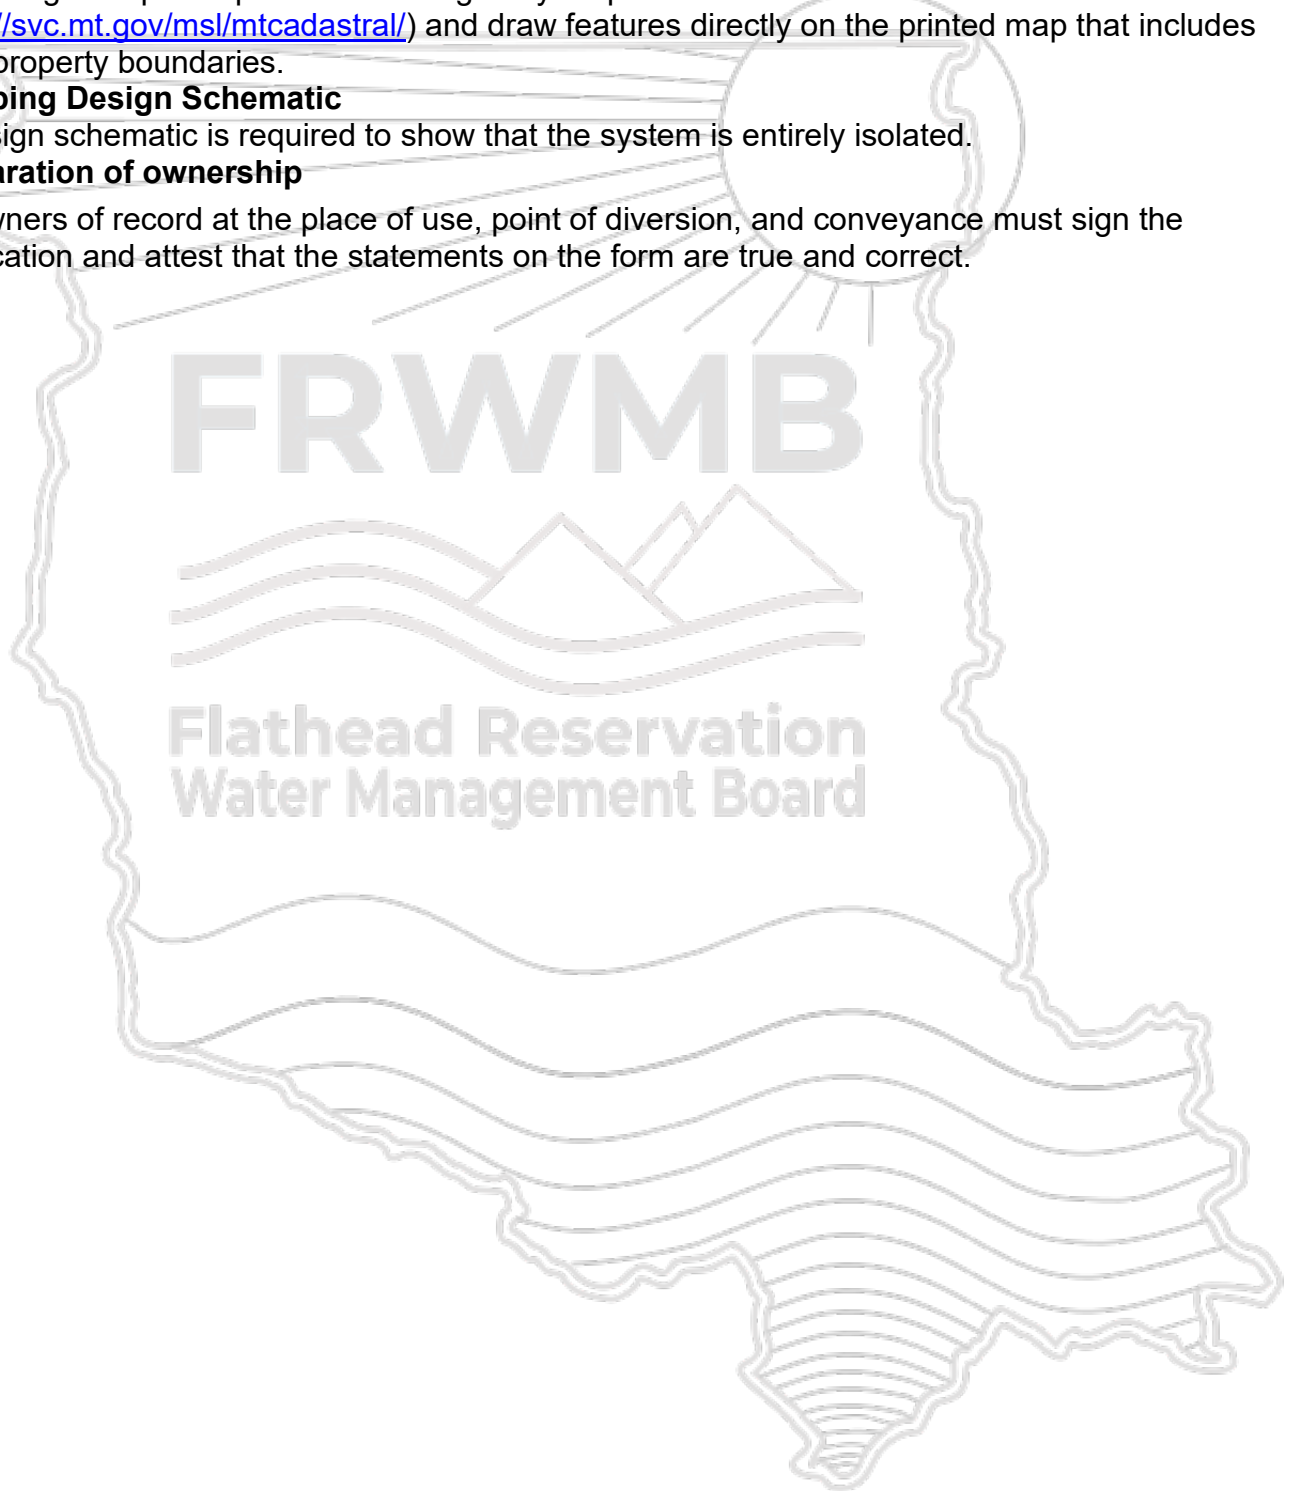

A finalized map is required. Include all information required on the form. A good option for producing a map is to print out an image of your parcel from the Montana Cadastral (<http://svc.mt.gov/msl/mtcadastral/>) and draw features directly on the printed map that includes your property boundaries.

**11. Pumping Design Schematic**

A design schematic is required to show that the system is entirely isolated.

**12. Declaration of ownership**

All owners of record at the place of use, point of diversion, and conveyance must sign the application and attest that the statements on the form are true and correct.
